Regional Development Banks in Comparison: Banking Strategies versus Development Goals Ruth Ben-Artzi

In a study that contributes to IR and IPE theory, Ruth Ben-Artzi raises substantive issues relating to aid, development, international relations and globalization. Regional development banks (RDBs), designed by politicians and economists to maneuver through labyrinths of economic, social, and political development, possess the potential to be central players in the long-term planning involved in healing and advancing poverty-plagued regions. However, RDBs in particular have received little attention. With a systematic analysis comparing four central regional development banks, this book explores why there's a variation in strategy despite similar institutional design. The formal arrangements and *raison d'être* of RDBs is to assist developing countries in the process of poverty alleviation - a task that is often a risky investment. Focusing on the dichotomy between their banking and development roles, Ben-Artzi demonstrates that RDBs are potentially critical catalysts in the fight against poverty, even with their institutional limitations.
