Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) A. Townsend Peterson, Jorge Soberón, Richard G. Pearson, Robert P. Anderson, Enrique Martínez-Meyer, Miguel Nakamura, Miguel B. Araújo

This book provides a first synthetic view of an emerging area of ecology and biogeography, linking individual- and population-level processes to geographic distributions and biodiversity patterns. Problems in evolutionary ecology, macroecology, and biogeography are illuminated by this integrative view. The book focuses on correlative approaches known as ecological niche modeling, species distribution modeling, or habitat suitability modeling, which use associations between known occurrences of species and environmental variables to identify environmental conditions under which populations can be maintained. The spatial distribution of environments suitable for the species can then be estimated: a potential distribution for the species. This approach has broad applicability to ecology, evolution, biogeography, and conservation biology, as well as to understanding the geographic potential of invasive species and infectious diseases, and the biological implications of climate change.

The authors lay out conceptual foundations and general principles for understanding and interpreting species distributions with respect to geography and environment. Focus is on development of niche models. While serving as a guide for students and researchers, the book also provides a theoretical framework to support future progress in the field.

From reader reviews:

Katy Pinkham:

Book is definitely written, printed, or descriptive for everything. You can recognize everything you want by a e-book. Book has a different type. As it is known to us that book is important matter to bring us around the world. Close to that you can your reading ability was fluently. A guide Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) will make you to be smarter. You can feel more confidence if you can know about everything. But some of you think that open or reading some sort of book make you bored. It's not make you fun. Why they can be thought like that? Have you searching for best book or appropriate book with you?

Jeannette Coleman:

As people who live in the actual modest era should be upgrade about what going on or data even knowledge to make them keep up with the era and that is always change and progress. Some of you maybe can update themselves by looking at books. It is a good choice for you but the problems coming to a person is you don't know which you should start with. This Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) is our recommendation to help you keep up with the world. Why, because book serves what you want and wish in this era.

Marni Johnson:

Now a day folks who Living in the era where everything reachable by interact with the internet and the resources in it can be true or not involve people to be aware of each info they get. How a lot more to be smart in having any information nowadays? Of course the solution is reading a book. Reading a book can help folks out of this uncertainty Information mainly this Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) book as this book offers you rich info and knowledge. Of course the details in this book hundred per cent guarantees there is no doubt in it you know.

Juan Jensen:

Reading a book tends to be new life style within this era globalization. With reading you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can share their idea. Guides can also inspire a lot of people. Many author can inspire their own reader with their story or maybe their experience. Not only the storyline that share in the guides. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors on this planet always try to improve their proficiency in writing, they also doing some analysis before they write on their book. One of them is this Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology).
