Microsoft PowerPoint 2002: Introductory Edition (I-series) Stephen Haag, James Perry

The I-Series textbooks strongly emphasize that students learn and master applications skills by being actively engaged. This introductory text has been written with clear steps to help students accomplish tasks that lead to a finished document, worksheet or database table. The authors believe that teaching how to perform these tasks is not enough for complete understanding and mastery; so they also discuss why the steps that students are about to experience are important, and what role they play in the overall plan.
