## **The Frequency, Severity, and Economic Consequences of Musculoskeletal Injuries to Firefighters in California** Seth A. Seabury, Christopher F. McLaren

The most common work-related injuries among firefighters are musculoskeletal disorders (MSDs). Understanding the frequency and severity of firefighter MSDs is more important with recent changes to California workers' compensation. This book describes the effect of work-related MSDs on firefighters' earnings and employment, the reforms' impact on disability ratings, and employment outcomes since the reforms to the medical delivery system.
