Orchidaceae Brasilienses (2 Volume Set) (English and German Edition) Guido F. J Pabst

Pabst and Dungs have compiled this work to present a complete list of the 191 genera and 2300 species of Brazilian orchids and the history of their discovery. These two books (Band I and II) are written in three languages, English, German, and Portuguese (ISBN 3871050106, 3871050107). There are systematic illustrations of the flower parts and numerous water color illustrations of the flowers. The Garay's system is followed with few exceptions in their arrangement of the Brazilian orchids. What makes these books so useful to orchid growers is Pabst and Dungs descriptions of the orchids in their natural habitat so that a grower may deduce easily the best growing conditions for their plants.
