An Introductory Course on Mathematical Game Theory (Graduate Studies in Mathematics) Julio Gonzalez-Diaz, Ignacio Garcia-Jurado, M. Gloria Fiestras-Janeiro

Game theory provides a mathematical setting for analyzing competition and cooperation in interactive situations. The theory has been famously applied in economics, but is relevant in many other sciences, such as political science, biology, and, more recently, computer science. This book presents an introductory and up-to-date course on game theory addressed to mathematicians and economists, and to other scientists having a basic mathematical background. The book is self-contained, providing a formal description of the classic game-theoretic concepts together with rigorous proofs of the main results in the field. The theory is illustrated through abundant examples, applications, and exercises. The style is distinctively concise, while offering motivations and interpretations of the theory to make the book accessible to a wide readership. The basic concepts and results of game theory are given a formal treatment, and the mathematical tools necessary to develop them are carefully presented. Cooperative games are explained in detail, with bargaining and TU-games being treated as part of a general framework. The authors stress the relation between game theory and operations research. The book is suitable for a graduate or an advanced undergraduate course on game theory. Table of Contents: Introduction to decision theory; Strategic games; Extensive games; Games with incomplete information; Cooperative games; Bibliography; Notations; Index of authors; Index of solution concepts; Subject index. (GSM/115)

From reader reviews:

Jody Vinson:

Do you certainly one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys this kind of aren't like that. This An Introductory Course on Mathematical Game Theory (Graduate Studies in Mathematics) book is readable through you who hate the perfect word style. You will find the facts here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to deliver to you. The writer regarding An Introductory Course on Mathematical Game Theory (Graduate Studies in Mathematics) content conveys objective easily to understand by many people. The printed and e-book are not different in the content but it just different available as it. So , do you still thinking An Introductory Course on Mathematical Game Theory (Graduate Studies in Mathematics) is not loveable to be your top collection reading book?

Lise Callicoat:

Precisely why? Because this An Introductory Course on Mathematical Game Theory (Graduate Studies in Mathematics) is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will jolt you with the secret this inside. Reading this book close to it was fantastic author who all write the book in such amazing way makes the content inside easier to understand, entertaining means but still convey the meaning completely. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of gains than the other book have such as help improving your ability and your critical thinking technique. So , still want to hesitate having that book? If I were you I will go to the guide store hurriedly.

Hugo Carter:

Reading can called brain hangout, why? Because when you find yourself reading a book particularly book entitled An Introductory Course on Mathematical Game Theory (Graduate Studies in Mathematics) your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely can become your mind friends. Imaging every single word written in a e-book then become one type conclusion and explanation which maybe you never get previous to. The An Introductory Course on Mathematical Game Theory (Graduate Studies in Mathematics) giving you a different experience more than blown away your mind but also giving you useful details for your better life in this particular era. So now let us teach you the relaxing pattern is your body and mind will probably be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary investing spare time activity?

James Martin:

In this age globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, newspaper, book, and

soon. You can view that now, a lot of publisher this print many kinds of book. The particular book that recommended for you is An Introductory Course on Mathematical Game Theory (Graduate Studies in Mathematics) this book consist a lot of the information on the condition of this world now. This kind of book was represented how does the world has grown up. The language styles that writer use for explain it is easy to understand. The particular writer made some analysis when he makes this book. That is why this book suited all of you.
