## **Teach students how—not what—to think about politics**

***Introduction to Political Science: How to Think for Yourself about Politics*** helps students gain the skills they need to think critically about a wide range of political topics—and to become more comfortable with politics itself as a result. In order to help introductory students navigate the shifting space of complex ideas that characterizes politics, author Craig Parsons offers a systematic presentation of a wide variety of political practices and ideologies, as well as the differing explanations for why people act as they do. In a time of low trust in government and rising distaste for politics, this fresh overview of political science invites students to engage these subjects in a way that is both supportive and open-minded.
