High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science)

On the 23rd of April, 2001, the 6th Workshop on High-Level Parallel Programming Models and Supportive Environments (LCTES'98) was held in San Francisco. HIPS has been held over the past six years in conjunction with IPDPS, the International Parallel and Distributed Processing Symposium. The HIPS workshop focuses on high-level programming of networks of workstations, computing clusters and of massively-parallel machines. Its goal is to bring together researchers working in the areas of applications, language design, compilers, system architecture and programming tools to discuss new developments in programming such systems. In recent years, several standards have emerged with an increasing demand of support for parallel and distributed processing. On one end, message-passing frameworks, such as PVM, MPI and VIA, provide support for basic communication. On the other hand, distributed object standards, such as CORBA and DCOM, provide support for handling remote objects in a client-server fashion but also ensure certain guarantees for the quality of services. The key issues for the success of programming parallel and distributed environments are high-level programming concepts and efficiency. In addition, other quality categories have to be taken into account, such as scalability, security, bandwidth guarantees and fault tolerance, just to name a few. Today's challenge is to provide high-level programming concepts without sacrificing efficiency. This is only possible by carefully designing for those concepts and by providing supportive programming environments that facilitate program development and tuning.

From reader reviews:

Nydia Kelly:

What do you about book? It is not important with you? Or just adding material when you need something to explain what you problem? How about your extra time? Or are you busy person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have free time? What did you do? All people has many questions above. They have to answer that question mainly because just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is right. Because start from on kindergarten until university need this particular High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) to read.

Terry White:

Do you one of people who can't read pleasant if the sentence chained inside straightway, hold on guys this specific aren't like that. This High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) book is readable by means of you who hate those straight word style. You will find the details here are arrange for enjoyable studying experience without leaving actually decrease the knowledge that want to offer to you. The writer connected with High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) content conveys thinking easily to understand by many people. The printed and e-book are not different in the content material but it just different such as it. So , do you continue to thinking High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) is not loveable to be your top record reading book?

Ariane Swanson:

The guide with title High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) has lot of information that you can study it. You can get a lot of profit after read this book. This particular book exist new information the information that exist in this e-book represented the condition of the world right now. That is important to yo7u to understand how the improvement of the world. This particular book will bring you inside new era of the globalization. You can read the e-book on your smart phone, so you can read this anywhere you want.

Ernestine Pagan:

This High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop,

HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) is new way for you who has interest to look for some information as it relief your hunger associated with. Getting deeper you on it getting knowledge more you know or you who still having bit of digest in reading this High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) can be the light food in your case because the information inside this kind of book is easy to get through anyone. These books develop itself in the form that is certainly reachable by anyone, that's why I mean in the e-book application form. People who think that in publication form make them feel tired even dizzy this reserve is the answer. So there is absolutely no in reading a book especially this one. You can find what you are looking for. It should be here for you. So , don't miss that! Just read this e-book variety for your better life and also knowledge.
