The rising trend for the use of essential oils sometimes extends to various uses in the household; but this still remains uncommon even amongst those who already use essential oils for other purposes probably because there are so many cheap household cleansers which already do a decent job. However, though these commercial products clean well enough, they are full of dangerous chemicals which can, in the long run, affect our health. Those with young children or with family members with sensitive skins and noses are most likely affected. Thus, some families are trying to search for more natural and less toxic alternatives.

For the household, it can be used to scent laundry, to sanitize surfaces and to deodorize the air. You can even cook with lavender essential oil. There are many recipes for sophisticated desserts like ice creams, cakes and jams using lavender essential oil. You can also use this to perfume soaps and shampoos.
