Set Theory and the Continuum Problem (Dover Books on Mathematics)

Raymond M. Smullyan, Melvin Fitting, Mathematics

Set Theory and the Continuum Problem (Dover Books on Mathematics) Raymond M. Smullyan, Melvin Fitting, Mathematics

A lucid, elegant, and complete survey of set theory, this volume is drawn from the authors' substantial teaching experience. The first of three parts focuses on axiomatic set theory. The second part explores the consistency of the continuum hypothesis, and the final section examines forcing and independence results. Part One's focus on axiomatic set theory features nine chapters that examine problems related to size comparisons between infinite sets, basics of class theory, and natural numbers. Additional topics include author Raymond Smullyan's double induction principle, super induction, ordinal numbers, order isomorphism and transfinite recursion, and the axiom of foundation and cardinals. The six chapters of Part Two address Mostowski-Shepherdson mappings, reflection principles, constructible sets and constructibility, and the continuum hypothesis. The text concludes with a seven-chapter exploration of forcing and independence results. This treatment is noteworthy for its clear explanations of highly technical proofs and its discussions of countability, uncountability, and mathematical induction, which are simultaneously charming for experts and understandable to graduate students of mathematics.

From reader reviews:

Jennifer Oaks:

Reading a e-book tends to be new life style in this particular era globalization. With examining you can get a lot of information which will give you benefit in your life. Having book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their own reader with their story or maybe their experience. Not only situation that share in the guides. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors these days always try to improve their talent in writing, they also doing some investigation before they write with their book. One of them is this Set Theory and the Continuum Problem (Dover Books on Mathematics).

Daniel Hartung:

This Set Theory and the Continuum Problem (Dover Books on Mathematics) is brand-new way for you who has attention to look for some information given it relief your hunger of knowledge. Getting deeper you in it getting knowledge more you know otherwise you who still having little bit of digest in reading this Set Theory and the Continuum Problem (Dover Books on Mathematics) can be the light food for you because the information inside that book is easy to get by simply anyone. These books develop itself in the form which is reachable by anyone, sure I mean in the e-book web form. People who think that in guide form make them feel tired even dizzy this book is the answer. So you cannot find any in reading a guide especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss it! Just read this e-book sort for your better life as well as knowledge.

Anthony Jones:

Within this era which is the greater man or who has ability to do something more are more special than other. Do you want to become one of it? It is just simple strategy to have that. What you should do is just spending your time almost no but quite enough to have a look at some books. On the list of books in the top record in your reading list is usually Set Theory and the Continuum Problem (Dover Books on Mathematics). This book that is qualified as The Hungry Hills can get you closer in getting precious person. By looking upward and review this publication you can get many advantages.

Scott Reisinger:

That publication can make you to feel relax. This particular book Set Theory and the Continuum Problem (Dover Books on Mathematics) was bright colored and of course has pictures around. As we know that book Set Theory and the Continuum Problem (Dover Books on Mathematics) has many kinds or genre. Start from kids until youngsters. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore , not at all of book tend to be make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading this.
