Spon's Civil Engineering and Highway Works Price Book 2012 Davis Langdon

Spon's Civil Engineering And Highway Works Price Book 2012 is more than just a price book. It provides a comprehensive work manual for the UK's civil engineering, surveying and construction business. It gives costs for both general and civil engineering works and highway works, and shows a full breakdown of labour, plant and material elements, with labour rates updated in line with the latest CIJC wage agreement.

In this twenty-sixth edition:

- assumptions on overheads and profits and on preliminaries have been kept low
- labour rates have been adjusted to today's rates
- steel products, structural sections and reinforcement show significant rises in price.

Structured to comply with CESMM3 and MMHW, the book includes prices and rates covering the key items that make a general civil or highway construction project – from slabs to sleepers and tanks to tying wire. In a time when it is essential to gain 'competitive advantage' in an increasingly congested market, this price book provides instant-access cost information and is a one-stop reference containing tables, formulae, technical information and professional advice.
