Vibro-Acoustics, Volume 1

Anders Nilsson, Bilong Liu

Vibro-Acoustics, Volume 1 Anders Nilsson, Bilong Liu

This three-volume book gives a thorough and comprehensive presentation of vibration and acoustic theories. Different from traditional textbooks which typically deal with some aspects of either acoustic or vibration problems, it is unique of this book to combine those two correlated subjects together. Moreover, it provides fundamental analysis and mathematical descriptions for several crucial phenomena of Vibro-Acoustics which are quite useful in noise reduction, including how structures are excited, energy flows from an excitation point to a sound radiating surface, and finally how a structure radiates noise to a surrounding fluid. Many measurement results included in the text make the reading interesting and informative. Problems/questions are listed at the end of each chapter and the solutions are provided. This will help the readers to understand the topics of Vibro-Acoustics more deeply. The book should be of interest to anyone interested in sound and vibration, vehicle acoustics, ship acoustics and interior aircraft noise.

This is the first volume, and covers the following topics: Mechanical systems with one degree of freedom, Frequency domain, Waves in solids, Interaction between longitudinal and transverse waves, General wave equation, Wave attenuation due to losses and transmission across junctions, Longitudinal vibrations of finite beams, Flexural vibrations of finite beams, Flexural vibrations of finite plates.

From reader reviews:

Priscilla McCreary:

This book untitled Vibro-Acoustics, Volume 1 to be one of several books that will best seller in this year, honestly, that is because when you read this book you can get a lot of benefit into it. You will easily to buy this specific book in the book retail store or you can order it via online. The publisher on this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Mobile phone. So there is no reason for your requirements to past this guide from your list.

Carmela Randle:

Reading a publication tends to be new life style with this era globalization. With studying you can get a lot of information that will give you benefit in your life. Together with book everyone in this world may share their idea. Publications can also inspire a lot of people. Lots of author can inspire their reader with their story or perhaps their experience. Not only the storyplot that share in the books. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors on earth always try to improve their ability in writing, they also doing some exploration before they write on their book. One of them is this Vibro-Acoustics, Volume 1.

Stacy Knarr:

Are you kind of hectic person, only have 10 or maybe 15 minute in your day time to upgrading your mind ability or thinking skill even analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short time to read it because all this time you only find publication that need more time to be read. Vibro-Acoustics, Volume 1 can be your answer given it can be read by anyone who have those short time problems.

Emily Scott:

In this period of time globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher which print many kinds of book. Typically the book that recommended for your requirements is Vibro-Acoustics, Volume 1 this publication consist a lot of the information in the condition of this world now. That book was represented so why is the world has grown up. The words styles that writer require to explain it is easy to understand. Often the writer made some exploration when he makes this book. This is why this book ideal all of you.
