Machine Learning for Multimedia Content Analysis (Multimedia Systems and Applications) Yihong Gong, Wei Xu

This volume introduces machine learning techniques that are particularly powerful and effective for modeling multimedia data and common tasks of multimedia content analysis. It systematically covers key machine learning techniques in an intuitive fashion and demonstrates their applications through case studies. Coverage includes examples of unsupervised learning, generative models and discriminative models. In addition, the book examines Maximum Margin Markov (M3) networks, which strive to combine the advantages of both the graphical models and Support Vector Machines (SVM).

From reader reviews:

Samantha Campbell:

As people who live in the modest era should be update about what going on or details even knowledge to make them keep up with the era and that is always change and make progress. Some of you maybe will probably update themselves by reading through books. It is a good choice for yourself but the problems coming to anyone is you don't know what type you should start with. This Machine Learning for Multimedia Content Analysis (Multimedia Systems and Applications) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

Wanda Stamper:

Do you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Make an effort to pick one book that you just dont know the inside because don't assess book by its cover may doesn't work this is difficult job because you are scared that the inside maybe not while fantastic as in the outside look likes. Maybe you answer is usually Machine Learning for Multimedia Content Analysis (Multimedia Systems and Applications) why because the excellent cover that make you consider regarding the content will not disappoint a person. The inside or content is usually fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

Peter White:

Are you kind of active person, only have 10 or 15 minute in your day to upgrading your mind talent or thinking skill also analytical thinking? Then you have problem with the book in comparison with can satisfy your small amount of time to read it because all this time you only find publication that need more time to be study. Machine Learning for Multimedia Content Analysis (Multimedia Systems and Applications) can be your answer given it can be read by a person who have those short free time problems.

Mae Marks:

That reserve can make you to feel relax. This particular book Machine Learning for Multimedia Content Analysis (Multimedia Systems and Applications) was vibrant and of course has pictures on the website. As we know that book Machine Learning for Multimedia Content Analysis (Multimedia Systems and Applications) has many kinds or genre. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and believe that you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for you and try to like reading in which.
