## Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics)

This book consists of both expository and research articles solicited from speakers at the conference entitled "Arithmetic and Ideal Theory of Rings and Semigroups," held September 22–26, 2014 at the University of Graz, Graz, Austria. It reflects recent trends in multiplicative ideal theory and factorization theory, and brings together for the first time in one volume both commutative and non-commutative perspectives on these areas, which have their roots in number theory, commutative algebra, and algebraic geometry. Topics discussed include topological aspects in ring theory, Prüfer domains of integer-valued polynomials and their monadic submonoids, and semigroup algebras. It will be of interest to practitioners of mathematics and computer science, and researchers in multiplicative ideal theory, factorization theory, number theory, and algebraic geometry.

### **From reader reviews:**

#### **Walter Cornwell:**

Have you spare time for the day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a move, shopping, or went to the particular Mall. How about open as well as read a book called Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics)? Maybe it is to be best activity for you. You know beside you can spend your time using your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have some other opinion?

#### **Jeffrey Haller:**

This book untitled Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics) to be one of several books that best seller in this year, here is because when you read this guide you can get a lot of benefit onto it. You will easily to buy this particular book in the book store or you can order it by using online. The publisher with this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason for you to past this book from your list.

#### **Angela Smith:**

Typically the book Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics) will bring you to definitely the new experience of reading the book. The author style to clarify the idea is very unique. Should you try to find new book to learn, this book very appropriate to you. The book Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics) is much recommended to you to see. You can also get the e-book from official web site, so you can quicker to read the book.

#### **Ronald Searle:**

The book Multiplicative Ideal Theory and Factorization Theory: Commutative and Non-commutative Perspectives (Springer Proceedings in Mathematics & Statistics) has a lot associated with on it. So when you check out this book you can get a lot of gain. The book was authored by the very famous author. Mcdougal makes some research previous to write this book. That book very easy to read you may get the point easily after scanning this book.
