Distributed Model Predictive Control Made Easy (Intelligent Systems, Control and Automation: Science and Engineering)

The rapid evolution of computer science, communication, and information technology has enabled the application of control techniques to systems beyond the possibilities of control theory just a decade ago. Critical infrastructures such as electricity, water, traffic and intermodal transport networks are now in the scope of control engineers. The sheer size of such large-scale systems requires the adoption of advanced distributed control approaches. Distributed model predictive control (MPC) is one of the promising control methodologies for control of such systems.

This book provides a state-of-the-art overview of distributed MPC approaches, while at the same time making clear directions of research that deserve more attention. The core and rationale of 35 approaches are carefully explained. Moreover, detailed step-by-step algorithmic descriptions of each approach are provided. These features make the book a comprehensive guide both for those seeking an introduction to distributed MPC as well as for those who want to gain a deeper insight in the wide range of distributed MPC techniques available.

From reader reviews:

Cynthia Carter:

This Distributed Model Predictive Control Made Easy (Intelligent Systems, Control and Automation: Science and Engineering) tend to be reliable for you who want to be considered a successful person, why. The key reason why of this Distributed Model Predictive Control Made Easy (Intelligent Systems, Control and Automation: Science and Engineering) can be one of several great books you must have is definitely giving you more than just simple looking at food but feed you with information that perhaps will shock your earlier knowledge. This book is handy, you can bring it just about everywhere and whenever your conditions at e-book and printed types. Beside that this Distributed Model Predictive Control Made Easy (Intelligent Systems, Control and Automation: Science and Engineering) forcing you to have an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day activity. So , let's have it and revel in reading.

Alice Wilkerson:

The actual book Distributed Model Predictive Control Made Easy (Intelligent Systems, Control and Automation: Science and Engineering) will bring that you the new experience of reading a book. The author style to elucidate the idea is very unique. In the event you try to find new book to see, this book very suited to you. The book Distributed Model Predictive Control Made Easy (Intelligent Systems, Control and Automation: Science and Engineering) is much recommended to you to read. You can also get the e-book through the official web site, so you can more readily to read the book.

Cheryl Bullen:

The book untitled Distributed Model Predictive Control Made Easy (Intelligent Systems, Control and Automation: Science and Engineering) contain a lot of information on this. The writer explains the woman idea with easy means. The language is very straightforward all the people, so do certainly not worry, you can easy to read this. The book was compiled by famous author. The author will bring you in the new period of time of literary works. It is possible to read this book because you can keep reading your smart phone, or device, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can open up their official web-site in addition to order it. Have a nice examine.

Jason Buckley:

Is it you actually who having spare time then spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something new? This Distributed Model Predictive Control Made Easy (Intelligent Systems, Control and Automation: Science and Engineering) can be the answer, oh how comes? A fresh book you know. You are thus out of date, spending your time by reading in this brand-new era is common not a geek activity. So what these ebooks have than the others?
