Technology Transfer from University to Industry: Insight Into University Technology Transfer in the Chinese National Innovation System Tang Ming Feng

Technology Transfer from University to Industry provides a cogent analysis of university technology transfer in the Chinese National Innovation System (NIS). The book outlines the NIS approach, analyses the building-up of the Chinese NIS and discusses the role orientation of university in the NIS. It also discusses three institutional innovations - the Chinese version "Bayh-Dole Act", university technology transfer offices and university incubators - in order to show how universities transfer technology to industry in the Chinese NIS. Additionally, it makes a cross-nation comparison of university incubators in China and in France. The book underlines the importance of university in improving weak absorptive and innovative capabilities of domestic firms and provides both practical and theoretical insights to policy makers and practitioners. The book will be a very valuable reference to university students and lecturers as well as to governments and firms who are interested in university technology transfer and the Chinese NIS. _____ TANG Ming Feng holds a PhD degree in economics from Louis Pasteur University, France and is currently an associate professor at Southwest Finance and Economics University, China. Her research interests include university technology transfer, regional/national innovation systems and industry clustering. Her publications include "Does the Chinese 'Bayh-Dole Act' Of 2002 Have The Same Effect As The US Act Of The Rising University Patenting?", "A Comparative Analysis Of University Incubators In China And In France", "The Effect of China's 'Bayh-Dole Act' on University Research and Technology Transfer" and "Science & Technical Human Capital and Economic Growth". She is also a contributor to "OECD Reviews of Innovation Policy - China" and a scientific committee member of la Revue Internationale de Projectique.

From reader reviews:

Martina Barton:

What do you think of book? It is just for students as they are still students or it for all people in the world, exactly what the best subject for that? Only you can be answered for that concern above. Every person has different personality and hobby per other. Don't to be pressured someone or something that they don't need do that. You must know how great along with important the book Technology Transfer from University to Industry: Insight Into University Technology Transfer in the Chinese National Innovation System. All type of book would you see on many solutions. You can look for the internet methods or other social media.

Donna Bohannon:

This Technology Transfer from University to Industry: Insight Into University Technology Transfer in the Chinese National Innovation System is great guide for you because the content which is full of information for you who all always deal with world and have to make decision every minute. That book reveal it information accurately using great manage word or we can declare no rambling sentences within it. So if you are read the idea hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but tricky core information with attractive delivering sentences. Having Technology Transfer from University to Industry: Insight Into University Technology Transfer in the Chinese National Innovation System in your hand like finding the world in your arm, info in it is not ridiculous one. We can say that no book that offer you world throughout ten or fifteen second right but this guide already do that. So , it is good reading book. Heya Mr. and Mrs. occupied do you still doubt in which?

Laura Buscher:

That reserve can make you to feel relax. This specific book Technology Transfer from University to Industry: Insight Into University Technology Transfer in the Chinese National Innovation System was vibrant and of course has pictures on the website. As we know that book Technology Transfer from University to Industry: Insight Into University Technology Transfer in the Chinese National Innovation System has many kinds or style. Start from kids until adolescents. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are usually make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading that will.

John Hayes:

As a pupil exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just little students that has reading's heart or real their interest. They just do what the teacher want, like asked to the library. They go to there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this

age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Technology Transfer from University to Industry: Insight Into University Technology Transfer in the Chinese National Innovation System can make you truly feel more interested to read.
