International Review of Sign Linguistics: Volume 1: v. 1

International Review of Sign Linguistics: Volume 1: v. 1

The International Review of Sign Linguistics -- which replaces the *International Journal of Sign Linguistics* - is planned as an annual series publishing the most up-to-date scholarly work in all aspects of sign language linguistics. There is no other comparable publication. The international community of sign linguists needs an authoritative outlet for its research findings. *IRSL* provides this forum for sign linguists, and for those mainstream linguists increasingly interested in sign languages, by filling the void in linguistic analysis of sign language -- as opposed to other concerns, such as deaf education, teaching sign languages, training interpreters, etc. -- and by pulling together in one place linguistic dialogue on sign language structure. It provides a scholarly focus for all linguists who need to remain current with developments in sign linguistics. For the growing international community, *IRSL* provides a focus for developments within the field and for advancement of the field in scattered research communities.

This review contains seven articles covering a wide range of linguistic areas, signed languages, and theoretical perspectives. Papers deal with the lexicon, morphology, phonology, syntax, pragmatics, prosody, metalinguistic issues, and socio-historical change. Five signed languages are represented including American, German, Australian, French, and Israeli.
